(TS//SI//NF) SSO HIGHLIGHT – Microsoft Skydrive Collection Now Part of PRISM Standard Stored Communications Collection

By NAME REDACTED on 2013-03-08 1500

(TS//SI//NF) Beginning on 7 March 2013, PRISM now collects Microsoft Skydrive data as part of PRISM's standard Stored Communications collection package for a tasked FISA Amendments Act Section 702 (FAA702) selector. This means that analysts will no longer have to make a special request to SSO for this – a process step that many analysts may not have known about. This new capability will result in a much more complete and timely collection response from SSO for our Enterprise customers. This success is the result of the FBI working for many months with Microsoft to get this tasking and collection solution established. "SkyDrive is a cloud service that allows users to store and access their files on a variety of devices. The utility also includes free web app support for Microsoft Office programs, so the user is able to create, edit, and view Word, PowerPoint, Excel files without having MS Office actually installed on their device."
